Greg: Great to meet you the other day. As per our discussion, I can create a completely new website for ghconsultingnw.com complete with all the content we need to describe your business to Google and visitors. I will also design a logo for you that you can use on print material and any other marketing materials. I will also train you and Barb to change and add content to the site which is very easy to use. I will also do research of the industry to create appropriate content containing keyword phrases that will help you be found in Google searches.

The website will have a completely custom visual design that meets your satisfaction. The website will include many features including a slideshow of photos, gallery of projects, content pages describing your services and experience, etc.

Web development \$1500

Logo development \$100

Annual hosting \$150

I generally like to get 50% down as a deposit before starting the project, and then final payment only after you are completely satisfied and everything is life and working. When you can if you could send a check for \$900 that would be great. My address is:

James Web Design
c/o James Hutchens
